Trailer unit, with both water and foam

There are many incidents that a fire rescue service attend, which do not require a full sized appliance. We at Team Leyland International Ltd have recognised this and offer an extensive range of small to medium Iveco and 4 WD fire-fighting vehicles. These tenders can be deployed efficiently to incidents or locations, which are inaccessible for larger fire fighting units. Our range of fire fighting vehicles includes:

- Fire incident vehicles
- Rescue vehicles
- Mobile command vehicles
- Personnel carriers

The vehicles are mounted with 400 – 1000 litre water tanks and a range of fire pumps to suit your requirements.

Our 4WD range of fire tenders, are based on the back of the World Famous Landrover Defender 110/130. These rugged and reliable 4WD/6WD vehicles will go where others cannot. Water capacity is 450 litres and various pumps can be fitted. Tanks are manufactured of polypropylene with alloy reinforcement. Fire fighting units can also be supplied on the Iveco Daily as a First fast response unit fitted with a 600litre tank, lightweight pump, AS ladder and a crew of 4 including 2BA sets

Spare parts are available for all vehicles supplied by Team Leyland International Ltd. The parts packages can be tailored to suit the conditions which the vehicles are working in, professional advice is available on specification, service and tooling for your workshops
